### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the allowability resides in the overall structure of the device as recited in sole independent claim 1 as amended, and at least in part, because claim 1 recites, *inter alia*: "An electronic component for overvoltage protection, comprising: predominantly organic functional polymers [...] wherein the device exhibits a given threshold voltage value manifested by the material compositions of the electrode and semiconductor layers". The aforementioned limitations in combination with all remaining limitations of said claim 1, are believed to render the claim and all claims dependent therefrom patentable over the art of record. Further, Examiner has performed assignee and inventor name searches in order to identify documents with possible double patenting issues. No conflicting claims have been identified.

2. Applicant's arguments regarding the IDS have been considered. The arguments regarding the foreign references with translation, foreign references in English language and US published documents have been found persuasive. Therefore the documents have been considered. The arguments regarding the foreign documents without the translation and with alleged explanation of the relevance have not been found persuasive. Therefore, these documents have been crossed through and have not been considered. Specifically, the arguments that "[T]he foreign language docs were cited as being relevant on the basis they were cited in foreign counterparts of the copending applications. This is a citation of their relevancy." This is not what the MPEP considers an explanation of relevance. The MPEP 609.04 (a) (III) clearly states that "the

Art Unit: 2835

requirement for a concise explanation of non-English language information would not be satisfied by a statement that a reference was cited in the prosecution of a United States application which is not relied on under 35 U.S.C. 120” (emphasis added). Further, the same section of the MPEP states: “[T]he concise explanation may indicate that a particular figure or paragraph of the patent or publication is relevant to the claimed invention. It might be a simple statement pointing to similarities between the item of information and the claimed invention”. Applicant has failed to provide such explanations for the not considered foreign documents that are not in English language. Further, the Applicant’s statement that “[T]he relevancy of the cited patents, the foreign language and other documents listed on the attached PTO 1449 is that these documents were cited in the copending applications noted in the accompanying Disclosure Statement or were cited in a foreign application that may have subject matter generally related to the subject matter of one or more of the cited copending applications” is not a proper explanation of relevance, since these copending applications have not been relied on under 35 U.S.C. 120”. Further, the Applicant’s statement that “these applications relate in different respects to organic electronic devices and/or method of making these devices such as transistors, diodes, integrated circuits and the like”, or similar generic statements, are not what the MPEP considers a proper explanation of relevance (see above). In order to provide proper explanation of relevance, Applicant must, regarding each foreign document that is not in English language, indicate which particular figure or paragraph of the document is relevant to the claimed invention or point to similarities between each particular item of information and the claimed invention.

Furthermore, documents cited on the international search report submitted with PCT opinion have been considered by Examiner.

3. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANATOLY VORTMAN whose telephone number is (571)272-2047. The examiner can normally be reached on Monday-Thursday, between 10:00 am and 8:30 pm..
